

Sivan Lasri

Software Engineer

Details

054-2300207

Sivanlasri4@gmail.com

Skills

Python	Java	C#
C	JavaScript	React
SQL	MySQL	Android
HTML	CSS	Node.js
Linux	Unity	TypeScript

Languages

Hebrew - Native

English - Fluent

Profile

Software engineer with hands-on experience in *app development*, *databases*, and tech instruction. Combines creative **problem-solving** with **strong analytical thinking** while effectively communicating technical concepts. Demonstrated **responsibility** and **teamwork** across collaborative projects, seeking development opportunities to create meaningful, impact solutions.

Professional Experience

Programming Instructor 2024-2026

Pre-Magshimim - *Magshimim Organization*

- Taught *Processing* (Java - Based) programming language to 8th grade students and *C# (.NET)* to 9th grade students
- Explained fundamental computer science concepts through interactive learning methodologies
- Guided students in developing interactive game projects, enhancing practical coding skills and problem-solving abilities

Education

B.Sc. in Software Engineering 2022-2026

Kinneret Academic College, Sea of Galilee | President's Honor for Excellence

- ✓ **GPA: 93**
- ✓ Awarded **President's Honors** for academic excellence in 2025
- ✓ **Relevant Coursework:** Data Structures, Algorithms, OOP, Databases, Data Mining, Operating Systems (Linux/Ubuntu), Computer Networks, Distributed Systems, Android Development, Web Application Development (Angular).

Full Matriculation Certificate (Israeli Bagrut) 2006-2018

Israel Ministry of Education

- ✓ Completed advanced curriculum in *Computer Science* with focus on C# Programming at 5-unit level
- ✓ Achieved high-level academic standing in *English* (5 units) and *Mathematics* (4 units)

Projects

WaterVision VR | VR Simulation & Training Platform (Final Graduation Project)

Development using Agile methodology (iterative development)

- Developed a virtual reality environment in Unity for team collaboration focused on water management
- Implemented key features including avatars, audit system, multiplayer, whiteboard and speech-to-text capabilities
- Utilized AI tools including Claude, Gemini, ChatGPT to enhance development processes and improve efficiency

Unity | Virtual Reality (VR) | Agile Development | UI/UX Design | AI Tools Integration

Mulligan - Distributed Parking System

Developed using a distributed architecture and containerized environment

- Designed and implemented a distributed system with customer, Peo, municipality, message broker, and DB components, enabling full parking session lifecycle management
- Built GUI and CLI interfaces and implemented validation logic for real-time parking verification and violation reporting via RabbitMQ
- Deployed the system using Docker, designed the DB schema, and implemented testing and CI/CD processes with GitHub Actions

Distributed system | Docker | Java | RabbitMQ | UI/UX | CI/CD | GitHub Actions

Military Service

National Service Guide 2018-2020

Herzl Museum | Lehi Museum

- Led Tours in Hebrew and English demonstrating strong audience adapting and public speaking skill
- Managed logistics and coordination to ensure smooth operation of guided tours
- Provided exceptional visitor experience through comprehensive knowledge and professional presentation
